
Full version of the DIGIOPROP MACRO PLUS for Windows. I didn't want to give this out if the Windows version wasn't significantly different than the version on my web site. If you want to find out what MACRO is all about, find the full version of the DIGIOPROP MACRO PLUS here. DVDLAB Review: For the past few years I've been working on creating new DVD tracks for PrivateRadio. I don't consider it work, I consider it art. I was interested in seeing how many would want to use it. Since the release of PrivateRadio 1.6 I have had several people download the dvd and DVDLAB and its clear to me that a lot of people are using it and liking it. This has led me to release DVDLAB for privateradio 1.7. I think you will find this new version of DVDLAB to be more user friendly and actually easier to use. DVDLAB allows you to create DVD tracks for PrivateRadio with the ability to include either Windows Media or Quicktime video for playback of your content. You can include any number of music tracks and you are given the ability to add your own captions or subtitles. Not only that, but you can create playlists and rate your content and can submit your tracks for the DJ community to use and vote on. You can even include links to other content on the PrivateRadio site. All of this is done through the addition of a series of simple scripting languages. For example, one of the coolest features is the ability to make you own "playlist of the month". In just a few minutes you can create an automatically playing playlist of your favorite music for anyone to use. One of the most useful features is the "score script". With a simple line of script you can rate a track on a scale of 1-10, and rate it accordingly. There are a ton of other features to make your job easier. All the information you need to create DVD tracks for PrivateRadio are listed on the website. You can even submit a suggestion on the form there. Goodies included on DVDLAB: ♦ 3.5" DVD LAB 1.5 with "Reserved" Programing (Reserved 1.0 not required) ♦ DVDLAB Playlist Creator v1.3 for DVD tracks ♦ Text file with all the content for every title on the menu ♦ MPEG2 video player 70238732e0

- Fixing of errors in automatically run macros. - Fixing of problems with macro saved documents (3d). - Update of Tools for IE history. ☑ Improved Windows interface. ☑ All the problems related with mouse buttons have been fixed. - Added the ability to change the option using the new GUI interface. - Ability to send e-mails with a report of what was found. - Ability to control tasks using the events. - Ability to run the program without any error messages. ☑ Ability to save the program, so you can make copies of the program. The program is distributed freely without any advertisements. If you find the program useful, please consider purchasing a copy for \$9.95. With your support the program can be better maintained. For more information visit our Web site: History menu Monday, May 17, 2014 In the world of the Internet has become the common platform for many different tasks, from financial transactions and communications to the sharing of data and documents, photos and videos. It also becomes the place for the storage of information, from personal identity to business documents and electronic messages. The IE History Sweeper solves this problem, by periodically deleting all information about the sites you have visited in IE, so that they do not end up in Internet Explorer history or index.dat file. If you want to keep the information about all the sites you have visited in the history, including the auto-complete, then use this tool. Moreover, for some websites that auto-complete without asking you for the URL, the tool can remove all this information from the browser history. What to Do With the Windows Shortcut Here are some key features of "IE History Sweeper": - Fixing of errors in automatically run macros. - Fixing of problems with macro saved documents (3d). - Update of Tools for IE history. - Added the ability to change the option using the new GUI interface. - Ability to send e-mails with a report of what was found. - Ability to control tasks using the events. - Ability to run the program without any error messages. - Ability to save the program, so you can make copies of the program. The program is distributed freely without any advertisements. If you find the program useful, please consider purchasing a copy for \$9.95.
