introduced in 2009 *Allium persicum*

Allium persicum, the Persian onion, is a species of wild onion native to the western and central part of the Eastern

Hemisphere. It is one of four species of wild onions with onion flavour, the others being *A. × tuberosum* (lentils), *A. cepa* (shallots), and *A. ursinum* (bear's onions).

Description Persian onions are an herbaceous biennial plant, growing to a height of . The leaves are finely cut and aromatic. The flowers are pink and white, borne in umbels. The flowers are followed by a rounded fruit, containing numerous seeds. **Distribution and habitat** *Allium*

persicum is native to much of Europe, western and central Asia. Its distribution extends as far east as the Ukraine and Poland. The most northerly reported locality is in the Northern Caucasus. It grows in dry deciduous woodland, and in scrubland and pastures. It is not usually found in moister habitats, but may occur in marshes, particularly if disturbed by trampling. References persicum

Ever hear of “personal jurisdiction?” It is a legal concept that is just as important, if not more so, to entrepreneurs as the ability to trademark their brand. It’s what gives a particular court the authority to hear a particular case involving a business entity. Last week, a federal judge in California

ruled that the defendant, Pershing Square, could not invoke the Fifth Amendment and avoid answering questions under oath before a federal grand jury that is currently investigating its Bitcoin-related activities. The basis for this decision is that the Fifth Amendment is not applicable to a witness being asked about information relating to a crime. The Fifth Amendment, of course, provides that “No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury.” Judge Lucy H. Koh of the U.S. District Court for the Northern District of California made it clear in her decision that the Fifth Amendment only protects a person from being forced to give incriminating
