want the British version you have to
pay for it. (The current British version
is available free of charge from the
BPS.) If you don't have a subscription
you can download it from the BPS
home page. Description: Description:

The building is situated near the St. Joseph's Hospital (A-2); the hospital lies between the Convent of the Sacred Heart and the Square of the Virgin of Mercy. This beautiful church is part of the Congregation of the Sacred Hearts of Jesus and Mary. The building was constructed in the first half of the 19th century, from 1852 to 1858. The façade is the work of Felice Gualtieri and Paolo Sartori. The parish church of Sacro Cuore di Gesù, located in Trastevere, was consecrated in 1858; this work was the last one of the architect Vicenzo Monti, who died in this year. The actual facade of the church, built in a more sober style, was inaugurated in 1970, but it was built before the

merger of the Sacred Hearts, and so it represents the first conception of the church. The main architrave, enriched with Greek mythology, is a remarkable example of the Baroque exuberant style. An inscription of the priest, Cardinal Rinaldo, a testimony to the cult of the Sacred Heart. The interior and the facilities of the church combine elements of the Roman Baroque and Gothic. The first church of the Sacred Heart was opened by King Umberto I in 1902. In 1950 the church was united to the Catholic Church, and the Sacred Heart started to be considered the Cathedral of the Congregation of the Sacred Hearts of Jesus and Mary. Absence of a link between C-

reactive protein and the severity of chest pain in patients with coronary artery disease. C-reactive protein (CRP), a marker of inflammation, may be a predictor of future cardiovascular events in the general population. This study investigates the relationship between CRP levels and the severity of chest pain in patients with coronary artery disease. We examined 460 patients with documented coronary artery disease. Patients were categorized into three groups based on whether chest pain was present, absent, or atyp 2d92ce491b
