Check this video for more detail A: This is a JPEG file, which by definition is a binary format. It will not be read by your browser. It is also not the right image. Q: What is causing my birds to have a weirdly short/wide neck? I've got a problem with a couple of blue footed boobies which I thought would be small in comparison to the other 2 in my flock, but there's no way they are small. They're at least 4 times the size of the other 2. I'll also mention that they are getting smaller, so that's my next question. I've tried lots of different kinds of food and supplement, but haven't really seen any improvement, I was wondering what could be wrong or if they could be stressed, any help would be appreciated. A: These birds are stressed (many of the other answers are right on the mark about nutrition and stress), and will be treated for it. The short/wide neck looks like it could be pinching (or possibly swallowing) their beaks, so you can reduce that stress by separating the birds (and hopefully by offering them a water bath) for a while. Do this until the birds are calm, then try to figure out which one has the problem and separate that one, and possibly do the same to the bird that has the beak. You also mentioned there's a problem with the size of these birds, so I want to mention that there is a scale of birds that is commonly used, and some people use it without realizing it. Here it is, the growth chart. The first three birds are the normal size of a blue-footed booby, and the last three birds are normally much larger. These are the babies. The 2 largest birds are called large birds, and the 3 smaller birds are medium birds. This is the first chart I found on google for blue-footed boobies, so I'm not sure if that scale is used for all blue-footed boobies or what. I found it by searching for "bluefooted booby growth chart". If you look at the birds in your pictures, the two large birds look similar, so either way, their growth is normal, and the difference in size is definitely due to stress. If I was you, I'd separate the
