## HOW TO USE PVC ID CARD SOFTWARE FOR Epson L805

Epson L305 The L305 is a low cost printer used for printing ID cards, the L305 prints on a two-ply card size of 190x145mm, with a color imprint on both sides and a cut at the top to make it ready for cutting. It has a built-in data storage card slot and is housed in a plastic casing. It is available for both Windows and Linux operating systems. Nspire Digital and the other manufacturer Epson, are the major corporate partners of building ID cards. The primary reason for choosing the L305 for the company ID cards is the price. To print ID cards in bulk, the company ID cards, the L305 offers savings as compared to the newer models of printers.

Since it is a cheaper printer, it is widely used to print color ID cards with the help of the inbuilt memory card slot. It prints up to five cards at a time. By the end of 2008, around 12 million units of L305 printers were sold to the worldwide market, thus surpassing even the more expensive L935. During the year of 2006-2007, annualized sales of the L305 averaged a revenue of \$18 million. In 2009, it was the most popular model of all the printers, due to its low price tag. For the global market, less than 1% of the 8 million printers were sold in 2008 and 2009. In popular culture The L305 is a very popular printer for office identity cards in

Europe. Especially in Belgium, where the printer was introduced. The L305 is a low cost printer used for printing ID cards, the L305 prints on a two-ply card size of 190x145mm, with a color imprint on both sides and a cut at the top to make it ready for cutting. It has a built-in data storage card slot and is housed in a plastic casing. It is available for both Windows and

Linux operating systems. Citing the ubiquity of id cards as evidence of the the danger of counterfeiting, the European Union and the United States have issued recommendations that identity cards be printed with more-secure printing techniques which eliminate the potential for counterfeiting. In many countries, banks and government entities will not accept a card printed with an inkjet or laser printer. Epson L305 The L305 is a low cost printer used for printing ID cards, the L305 prints on a two-ply card size of 190x145mm, with a color imprint on both
