The purpose of this study was to explore educators' perspectives of the balance between 'challenging' and 'supportive' learning environments to promote both social and academic learning among adolescents with mild intellectual disabilities. This study employed a qualitative research design using an interpretive approach. This study involved semi-structured interviews with 16 educators working in a large Irish secondary school in which adolescents with mild intellectual disabilities were educated. The interviews were transcribed and thematic analysis was employed to identify emergent themes. Three key themes were identified as being critical to promoting learning and social interactions. Firstly, it is the educator's role to not only model what the learner should be able to do, but also to demonstrate what they can do. Secondly, the educator's role is to offer support and to be a role model. Finally, the educator must facilitate social interactions to promote meaningful learning. In addition, many adolescents in the school were dealing with social, emotional and behavioural challenges and educators need to understand this, in addition to being aware of students' needs and challenges. Although researchers have reported on the importance of social and emotional support for students with mild intellectual disabilities, this is the first study to report on the importance of educators' ability to facilitate social learning. What's good for the San Diego Padres might not be good for the Los Angeles Dodgers. After landing a package headlined by James Shields, the Padres might be willing to give up a future asset to land Zack Greinke in a trade for the two-time Cy Young Award winner, according to Jon Heyman of CBS Sports. The Cubs and White Sox are reportedly seeking Shields and the White Sox might be willing to trade Chris Sale, but the Padres would rather deal for Greinke, who has two years and \$52 million left on his contract. The Padres' frustration with pitcher Yonder Alonso might also play a role in the club's willingness to trade for Greinke, per Heyman. Alonso was the subject of trade rumors after the first half of the season and might be willing to leave San Diego if the right package came along. San Diego is reportedly still engaged in trade discussions with the Yankees, Padres, Red Sox and Pirates, 2d92ce491b
