TranslatePi Crack +

TranslatePi is a user-friendly and intuitive piece of software that can help you discover the meaning of a word or sentence in a foreign language with minimal effort, requiring you

simply to press a couple of buttons on your keyboard. Clean and function-oriented looks The application features a practical and accessible user interface, generally running minimized in the notification area and only revealing its main window when called out using the CTRL+C and CTRL+Space keys. From the system tray menu options, you can adjust the 'Settings' of TranslatePi,

specifically the source and target languages, by browsing through an extensive list.

Swiftly translate foreign phrases by means of hotkeys

The program is able to work with any selectable text, meaning you can easily use it in text editors, web browsers, while reading a book or surfing the Internet, whenever you encounter a foreign word or even a sentence whose meaning

you do not understand.

Normally, when you come across an expression that you do not know, you copy the phrase to clipboard, then paste it in an online translator or look up the words in the dictionary, but this can be quite time consuming and bothersome, particularly if you are in a hurry to get your work done. However, by using TranslatePi, you can simply copy the

problematic phrase, using
CTRL+C, then press
CTRL+Spacebar to reveal the
window of the application and
simultaneously, the meaning of
the selected item. The hotkey,
however, cannot be changed.
The utility enables you to save
both time and effort by
providing you with the answers
you need in no time.

TranslatePi even allows you to
copy it to clipboard and paste it

in a different document. A straightforward translation tool. All things considered, proves to be a handy and effective program that can help you discover what certain terms mean in a foreign language, requiring just a few keystrokes on your part, and thus entailing a minimal level of effort. Get the latest from Windows 10, Microsoft Office and Microsoft Edge. Plus, explore ways to

keep your computer safe from hackers, back up your data, use a virtual private network (VPN) and spyware, and find out about your PC's health. Tenorshare Video Converter Ultimate is a powerful video converter app that can convert almost all popular video formats (FLV, AVI, MP4, MKV, MOV, VOB, M4V, WMV, RM, 3GP, HD

What's New in the TranslatePi?

TranslatePi is an easy-to-use, fast and efficient tool for translating a foreign word or a sentence written in any selectable text. In a few minutes, you can get the desired translation of a word or an entire text, even if you have not used the definition of a given word or phrase before. Key Features: - Translate any text in any selectable language, regardless of the original text

being written in English,
Spanish, French, German,
Arabic, Hebrew or any other
language - Paste the translation
back into a note, email or text
document in any language -
Ability to Save both the original
and the translated text, so that
you can even use it in another
text application - Translate a
single word, a sentence or a
phrase in any text - Easily select
any text by hovering over it

with the mouse - An extensive list of languages is available for selection - Save the source text to clipboard, so you can use it directly in any software or even in a web page - Translate text right in any text editor - Translate quickly even in the most popular web browsers, without having to go online to any translation website - History of the translations you have done - Works in offline

mode - Tested on Windows and OS X
