Compiler 8 Demo. 4774, Digiarty Software, Inc. WinX DVD Ripper Platinum 6.3.5.Q: How do I remove my KVM host from my MPLS core I have installed KVM on a core switch and I want to remove it. The switch has 2 VLANs, 1 for management(it's the default VLAN) and the other is a private one. I want to use the switch as a routed switch. How do I remove KVM so my private VLAN traffic can go through the switch in an unencumbered manner? A: What you need is a Layer 2 Switch.

---

KVM is a Layer 3 Switch. For your use-case you need a Layer 2 Switch with routing functionality, so you can configure routing functions on that. Not a simple 1 Gb router. You need a Layer 2 Switch with routing capability, you can take a look at Cisco Catalyst switches, Mikrotik switches, HP Procurve switches, etc. That's why you get a Layer 3 switch, and a Layer 2 switch.

Basically a Layer 2 Switch is just that: a switch. While Layer 3 switches do have routing functionality as well, this is not

---

really needed for Layer 2 switch. (aside from being more complex and expensive). To route Layer 2 traffic, you just configure ports as "trunk ports". If it's a layer 2 switch: trunks:

1:trunk,2:trunk,3:trunk Layer 2
