This software is a must have as it can help you create great HD pictures with just a few clicks. It will enable you to set a fixed picture and use the hbgenman software to implement all the features. Software : hbgencontexthdviewtechnique Create a HD View in Photoshop Using the Window menu Use the Window menu to open a new image window. From the New down to create new, choose HD Image. Then, select Photoshop HDView 64 from the source type dropdown list. Select a 1920 x 1080 pixel HD View file. Add or subtract an alpha channel or convert the alpha channel to RGB. You will have the option of adding a PNG, JPEG, or TIF file to the HD image. You can also add a JPEG file with transparency. You can also choose a file that is currently opened in Photoshop and place it on the HD window. STEP 3: Build an HD View with the hbgenman tool Let's begin building a HD view. Open the hbgenman in Photoshop. Choose a HD view that you want to build and follow the instructions. When the hbgenman is done building the HD view, you will have a well organized view. STEP 4: Add a Rounded Corners effect to the HD View Rounded edges and edges with corners can give a nice clean view of your image. Open the Rounded Corners effect, and in the window, choose a radius that is about half of the image size. This will soften the corners and it will add another layer to the HD view. Do not use the liquify tool because it will only blur the edges. Click OK to add the effect to your HD view. You can also add another effect for blurring the top corners. You can choose the one or the other effects that you like. STEP 5: Add a Drop Shadow effect to your HD
