A forensic sketch artist and her team used a technique called low-shot facial reconstruction to create images of four elderly men who investigators believe might be responsible for nearly 50 sexual assaults at Massachusetts colleges over a span of two years, NBC News reported. Sandra Lamb, a British forensic artist who has worked on crime dramas such as "Trial & Retribution" and "Criminal Minds," said she and her team of specialists "work on identification, not re-enactment." "We do not involve ourselves in re-enacting crime scenes. However, in the case of a suspect that has been arrested and convicted of a series of assaults we are able to use the existing evidence to create a composite sketch or reconstruct a face, so that if the police have been unsuccessful in finding the suspect, we can produce a sketch that could then be used in their investigation," she said. Lamb told NBC News that the four men were part of a1d647c40b

What's New In?

Print wireframe and finish-preview drawings. Insert the finished print wireframe or preview drawing into your presentation or AutoCAD design. AutoCAD automatically includes the surrounding, or “fringe”, detail in the finished print or presentation. The final step is for you to edit the print wireframe drawing or presentation for design intent. The finished print or presentation automatically updates within AutoCAD. Drawings, blocks, and annotations are automatically updated in real time. Prints are automatically sent to your printers, and the presentation updated to reflect your changes. (video: 1:57 min.) Plus, AutoCAD continues to innovate in a new and expanded realm of design and drafting. Icons Available with All-New Functionality: All new icons available, in addition to those that were introduced in the 2018 release of AutoCAD and presented in the 2019 release of AutoCAD Architecture. A single icon enables you to modify the current drawing or the presentation — and all saved drawing files — simultaneously. In previous releases, that was not possible without manually exporting and importing all drawings and slides. New Functionality to Design and Draft: The DesignCenter provides expanded functionality for designing floor plans. Connected drawing and presentation files are now available. The drawing and presentation can have the same set of blocks, and any change to the blocks in one drawing or presentation automatically updates the other. (video: 3:43 min.) Add annotations in an unlimited number of positions, without regard for existing drawings. Add scale markings and elevation lines that stay with the added annotation. Unlimited blocks. New Functions to Manage and Store Drawings: The Window interface is expanded to provide the tools you need to easily manage drawings. A command to create a new window is now provided, in addition to previous function windows, such as the DesignCenter. Printing is now easily managed. Design drawings and presentations can be automatically uploaded to your print server or directly to a user-defined printer. Automatic update and sharing of print settings from the default settings are now available. A new printing settings dialog provides additional options. File-by-file management is now provided for the entire Windows installation. An automatic update service ensures that the latest build of AutoCAD is available to you. Version History: 2020.01: Introduced in the 2019
