1.1.5.8 serial number 19Q:

MvcSiteMapProvider JSON returns controller action results in a format that seems impossible. I have MvcSiteMapProvider MVC4 installed on a project and the routing works fine. The problem I have is that sometimes the JSON return from the desired URL is in a format that seems impossible. The error message I get is Exception Details: System.ServiceModel.CommunicationException: The server encountered an error processing the request. See server logs for more details. The server logs say that it is a POST to " with a GET being made on the POST to " The problem is it doesn't do a GET, but obviously it is complaining because I have an action that is returning JSON. But it is JSON

in the format that would normally be returned if the action was being called directly. I'm thinking that the `_TopValue` property of `ControllerActionKey` is not doing what it is supposed to, and that is somehow causing the action to return in a format that `MvcSiteMapProvider` is not expecting. I'm puzzled as to what is going on, because I have an action that is returning `3e33713323`
