**Garmin 1000 Cessna PC Trainer V8.01.exe**

23 I downloaded and installed the latest version of the Garmin 1000 simulator (v12.x) that uses the Garmin G1000H satellite flight display, and could no longer adjust elevation. Cessna has issued a

---

revision to the release date to May 15, 2011 (rather than June 15, 2011).

This may be for one of the issues below. I have been putting off writing this post because I didn't want to go down a more ridiculous rabbit hole. Cessna says that the Garmin 990 (basically the same as the Garmin G1000, with a slightly different case) has been fixed so I think the fixes will come to the G1000 if they fix the G1000. I don't think the G1000 has ever been officially released. But I could be wrong and I am not an expert on the Garmin 1000 (the position was more

---

research, and I couldn't find any consumer docs on it, so I use the service manual as my best bet). A friend of mine recently talked to Cessna and asked what was going on with the new electronic stabilizer. He was told that Cessna has some misperception issues with the electronic stabilizer and that they are looking into it. A lack of documentation does not necessarily mean that there is nothing. As I mentioned, I have been putting off writing this because I want to wait for a fix from Cessna. They normally do this quite fast, but they have been

---

really slow to fix the G1000 (even though it is the same model, the same software, and obviously the same issue). I am very interested in this because I bought my G1000 flight simulator about 5 years ago and am wanting to update with the software that is now available (I bought the G1000 as a trainer because my sim only had that, and I bought v12.x version because it was the latest). If you are having problems with the G1000 (or G1000H), post here or go to Cessna and see if they would be interested in your help in a forum. Cessna has a

---

small help desk, and you can usually get someone in there (after hours and weekends) to help you, but that is not a public forum. I should mention that I am not paid or anything for saying this. I just love my hobby and want to share my experience. Garmin 1000 Cessna PC Trainer v8.01.exe This one is compatible with the latest version of the Garmin G1000. Let's talk 3da54e8ca3
