Create a new project (Autocad → New Project) and name it "logo". Click OK and wait to finish the loading process. Choose the "logo.dwg" file. Set the layer as "Layer 1" and the creation of the logo as "Profile". Finish the "logo.dwg" file. Save it as a "dwg" file. The "logo.dwg" file is now open, and here we start to design the logo. Why should we create a logo? It is one of the most important elements in any business. The logo is the first thing people will see, and it's how you make a connection with the customer. The logo is like a personal greeting to the people who visit your business, and it is the icon of your brand. That means your logo is the business "face" and you will never change it. How to make a good logo A logo is never created in one minute, but is a long, creative process. Many of the designers use a strategy to build a logo, but this is something that is not universal. For that reason, if you want to make a good logo, you need to read this tutorial, because it helps you understand the essence of good logos and how you can start creating your logo right away. There are four tips that will help you to create a logo that is more consistent with the principles of a good logo. 1. Create a logo that represents you. The logo represents you, and it is the first element of your branding. Make sure that the logo is a good representation of the identity of your business. Use colors that are representative of your business and that can be understood by your target customers. Creating a logo for a company that will be installed in a building is not very different from a company that will sell his services through advertising campaigns. In both cases, the logo must be related to your business. 2. Keep the number of elements. Your logo should contain only a limited number of elements. The best logos have a limited number of shapes and elements that help people to understand the meaning of the logo. A logo should not be a puzzle that is hard to solve. 3. Use iconic shapes. An iconic shape is an image that represents the business, and it should be a part of the logo. It must
