What's New In SQLiteConverter?

... In brief, SQLiteConverter is a PHP/ASP/JSP/ASM/C#/Java/C++ application that makes it easy to convert your remotely hosted MySQL, PostgreSQL and Oracle database to SQLite. It is a flexible and powerful solution that supports foreign keys, triggers, functions, constraints, views and more. In addition to this, you can export and import sql schema, and create normal sql statements using the SQLite3 compiler. Step by step documentation is provided for all the main operations. When you have finished importing your data from your server, SQLiteConverter creates a sqlite database file (a single file) that can be dropped anywhere on the server or elsewhere. You can do all of this without the need for the database server to be running and you won't need to stop or close it during your conversion process. Finally, there is also a simple web interface which allows you to
