* _Adobe Photoshop_, by Larry Schneider, _Photoshop All-in-One For Dummies_, by Greg Harvey, and _Photoshop CS6 Essentials For Dummies_ by Greg Harvey are good resources for beginners. The latest update to Photoshop, the 2015 release is called Photoshop CC 2015. If you're a beginner, you should save your money and purchase Photoshop Elements, which is designed to be your beginner's editing tool. Photoshop Elements 11 offers many features that are similar to Photoshop CC 2015. In this chapter, you find the following tools: _• Draw_ (used to create line work) _• Paintbrushes_ _• The Spot Healing Brush_ (for fixing areas of unwanted objects in an image or unwanted effects in objects) _• The Clone Stamp_ (to perfect or fix areas of unwanted effects in objects) _• Levels_ (an image adjustment tool that you use for raising and lowering the brightness of an image) _• Smart Objects_ (used to change parts of an image that are visible on its own or on other images) _• The Eraser tool_ (used to remove unwanted objects or information in a photo) At the top left of the screen, click the Edit tab to bring up your editing options. You also find four hidden buttons on the top toolbar, just to the right of the Tab key, labeled Patch, Shadow, Sponge, and Blur. See the "Developing skills with Photoshop elements" sidebar for details on these tools. ## Using the Draw Tool The **Draw** tool is your line-drawing tool in Photoshop. Use the Draw tool to draw on your image and create lines, shapes, and arrows. You can use the Pencil, Pen, and Calligraphy tools to create your lines. Here's how to use the Draw tool to draw different types of lines: * **Draw freehand:** Click in the area that you want to create a line, and then draw straight lines or curves to create shapes. For example, to draw a circle, click inside the circle at the start and draw out a round line. To

draw a rectangle, click at the start and end points. * **Draw with a pencil:** Click with the Pencil tool, which, like the Brush tool in the next section, automatically converts to a line. You can use the options that you see,

Evaluation of oral health practices and dental health status among primary school children in the United States: an examination of the relationship with NIDCR Sibling Report. The objective of the present study was to investigate oral health practices and dental health status of primary school children in the United States, and to determine any relationships between these variables and children's race/ethnicity and personal and parental oral health-related beliefs and behaviors. In 2003-2004, 4560 children from 80 schools participated in the study. The mean age of the children was 8.8 years. A parental oral health survey was administered to the children's parents or caregivers. Four dental health status indices were investigated: DMFT, dmft, F:DMFT, and F:dmft. A structured dental examination of the children was conducted, and the percentages of children with healthy gums and without past dental caries were calculated. The dmft index was used to determine the status of primary and permanent dentition. The results demonstrated that 13.7% of the children exhibited previous dental caries experience, and that 46.2% of the children exhibited sound gingival health. Molar-incisor and overall dental caries indices were significantly different among minority and non-minority children. This study has implications for the dental health of young children in the United States.

Q: How to write a function that changes all int into float? I have to write a function that changes all Int values in the array passed by the user into floats. If the user inputs 50 to be the number of elements in the array, then it should output 50.0 This is what I wrote so far: def changeIntToFloat(array): array.extend(float(array[i])) return array

A: def changeIntToFloat(array): array = [float(n) for n in array] return array

Q: Can I create a View that's an image of a ViewGroup? I would like to create a view in an application that's the same image as a viewgroup. Is this possible? For example, I have a view with a circular 2D progress bar. It looks like this: I'd like to create a view that looks the same (aside from translation and rotation). I tried to do it by setting the transformation
