Adobe Photoshop, its image-editing software, has been free of charge since it was first released in 1987. While it is free to download, users are required to pay to purchase upgrades and add-ons as it continues to evolve. Photoshop Elements, a free counterpart to Photoshop, is much simpler than Photoshop. It lacks many of the more advanced features, but it does provide a good starting point for Photoshop beginners.

The White House has issued a stern warning to Congress against defunding the Affordable Care Act. "I think it's important for us to make absolutely clear to anyone who is listening that we don't want to see a government shutdown," White House deputy press secretary Eric Schultz said Thursday. "But we also are not going to be able to achieve our goal of a government that protects taxpayers' money, holds the line against deficit spending and preserves the basic goals of the Affordable Care Act by letting Obamacare continue," Schultz added. ADVERTISEMENT Schultz's comments came a day after a sizable majority of House Republicans said they were willing to shut down the federal government if the Supreme Court rules against the Obama administration's subsidies for people purchasing ObamaCare. Schultz said that such a scenario would be "a worst-case, very bad outcome." The major sticking point in efforts to repeal and replace the law appears to be the cost of building President Obama's health-care coverage plan. Republicans say the president has broken a promise not to raise taxes during his time in office, but Democrats have charged that their efforts to keep ObamaCare on life support is a political maneuver to protect the program. Schultz told reporters that Congress and the president both have to live with the Affordable Care Act and that when "a lot of focus" was put on the individual mandate, they could have found a way to mitigate any concerns about the law by working on other parts of the law. "When the debate has gotten to the point of 'Well, the government is paying for it, so therefore we can't defund it,' there are many ways to pay for the Affordable Care Act," Schultz said. "And so that's what the focus has to be on, is the fact that for the individual mandate and all the ways that the Affordable Care Act is being funded, the government is going to be paying for it. "The individual mandate gets expensive when there's no penalty," he added. What's New in the?

Q: Subsonic - constructor is private I have a class like this:

```
public class someClass { private Subsonic4.Subsonic4 sql; public someClass(string someString, int someNumber) { sql = new Subsonic4.Subsonic4(someString, someNumber, Subsonic4.Async, Subsonic4.Aurora); } }
```

 the problem is that in debugger "sql" in value with the default constructor is null and in constructor is set to Subsonic4 class. Why? Is it means something in debugging mode or is it a bug in Subsonic? A: You need to initialize a property with a get;

```
public class someClass { private Subsonic4.Subsonic4 sql; public someClass(string someString, int someNumber) { sql = new Subsonic4.Subsonic4(someString, someNumber, Subsonic4.Async, Subsonic4.Aurora); } public Subsonic4.Subsonic4 Sql { get { return sql; } } }
```
