► Roblox.org/Roblox As a programming platform, Roblox enables users to build experiences for their PCs and mobile devices using visual programming languages, known as “Blocks” that are inspired by LEGO construction toys. Users can create their own games, chat with friends, and play with a virtual audience from around the world. Games are built by combining “Blocks” in much the same way that toy builders play with a kit of interlocking plastic building bricks. Users can access Roblox via a web browser or Roblox Client, the company’s proprietary software application. The software application is available for PC, Mac, Xbox, PlayStation, Nintendo Switch, Apple TV,

Android, iOS, and Sony TV, and Roblox recently released an in-game virtual reality platform. Roblox has produced content and licensing deals with Star Wars, Marvel, Cartoon Network, Universal Pictures, Fox, and Mattel, among others. The company, which began as a privately held company, released its first line of gaming content (known as “Builders Club”) in 2009 and was subsequently acquired by the San Francisco-based online entertainment company, imLive. 2:49 My Experience with Roblox My Experience with Roblox My Experience with Roblox Finally on my channel I share my experience with Roblox.
